

# Kaviya R

Frontend Developer

Coimbatore, Tamil Nadu, India

Phone: 6379344240 · [kaviyaramanathan587@gmail.com](mailto:kaviyaramanathan587@gmail.com)

[LinkedIn](#) · [GitHub](#) · [Portfolio](#)

## Summary

Frontend developer who has built React applications from the ground up: Go\_Transit, a real-time bus tracker with a live Express/Firebase backend, and JiraWay, a Jira learning platform designed to be intuitive for people using Jira for the first time. MCA graduate (Bharathiar University) seeking a Frontend Software Engineer role.

## Projects

JiraWay [GitHub](#) · [Live Demo](#)

- Noticed most Jira tutorials only explain the tool, not let you practice it — so built a hands-on learning platform where beginners work inside a real, interactive ticket board instead
- One ticket runs through all 5 modules — orientation, creating issues, updating progress, boards & sprints, backlog planning — giving learners a full sprint from start to finish
- Built a fully interactive board — drag-and-drop tickets, subtasks, comments, priorities, story points, epics and sprints — all managed client-side with localStorage persistence
- Wrote a detailed README covering the problem, features, and architecture for anyone reviewing the project
- Stack: React, Vite, Tailwind CSS

Go\_Transit

[GitHub](#) · [Live Demo](#)

- Noticed commuters waiting for a bus have no way to know exactly where it is or when it'll arrive — so built a real-time tracker showing live position, ETA, distance and speed on Google Maps, searchable by bus number or stop
- Built a REST API with Express simulating realistic GPS bus movement, streaming live position to Firebase every 2 seconds
- Documented the backend architecture and known limitations in the README
- Stack: React, React Router, Google Maps API, Node.js/Express, Firebase Realtime Database

## Skills

- Core: React, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Vite
- Familiar with: Node.js, Express, REST APIs, Firebase, MongoDB, SQL, React Router, Google Maps API, Git/GitHub, Agile methodology

## Certifications

- Introduction to Front-End Development — Meta (Coursera), 2023
- Get Started with Figma — Coursera, 2023
- Cypress UI Automation Testing — Coursera Project Network, 2025
- Data Analysis and Visualization with Power BI — Microsoft (Coursera), 2024

## Education

- Bharathiar University — Master of Computer Applications (MCA), 2023–2025, CGPA 8.64/10
- Gobi Arts and Science College — B.Sc. Physics, 2020–2023, CGPA 8.42/10

## Experience

- Senior Process Associate, Innoura Technologies — Jun 2025–Jun 2026
- Annotated LiDAR 3D point cloud data using 3D bounding boxes, following detailed project guidelines and maintaining high accuracy and consistency
